Shang Yang

shangy@mit.edu · ys-2020 · Shang Yang · ys-2020.github.io

Education

Massachusetts Institute of Technology (MIT) Sep. 2023 - Present
Ph.D. Student in EECS, advised by Prof. Song Han. Cambridge, MA

Tsinghua University Aug. 2019 - Jul. 2023
Bachelor of Engineering in Electronic Information Science and Technology Beijing, China

- Overall GPA: 3.99 / 4.0 Rank: 1 / 256

Research Interests

Machine Learning Systems; Efficient LLM Post-Training; LLM Agents & Multi-Agent Systems; Model Compression, Quantization & Sparsity; Efficient Inference & Serving.

Selected Publications Google Scholar

* Equal contribution · † System lead · **5,800+ total citations** as of Oct. 2026.

[1] Ji Lin*, Jiaming Tang*, Haotian Tang*†, **Shang Yang***†, Wei-Ming Chen, Wei-Chen Wang, Guangxuan Xiao, Xingyu Dang, Chuang Gan, Song Han. ***AWQ: Activation-aware Weight Quantization for LLM Compression and Acceleration.*** **(MLSys 2024 Best Paper Award)**

Selected Open-Source Projects

mit-han-lab/llm-awq (3.7K Stars)

- Low-bit LLM quantization and efficient GPU inference with AWQ and TinyChat.
- Adopted by NVIDIA TensorRT-LLM, Hugging Face Transformers, vLLM, SGLang, etc. AWQ-quantized models have **200M+ downloads** on Hugging Face.
- System lead: quantization, GPU kernels, inference runtime, and deployment.

NVlabs/VILA (3.9K Stars)

- Efficient vision-language models for image and video understanding.
- Adopted by NVIDIA Cosmos, NIM, Jetson Platform Services, and the VSS Blueprint. The VILA model family has **5M+ downloads** on Hugging Face.
- Inference lead and core contributor: quantization, GPU kernels, runtime, and performance.

mit-han-lab/omniserve (800+ Stars)

- Unified LLM serving with low-bit quantization (QServe) and sparse attention (LServe).
- Quantization adopted by TensorRT-LLM and SGLang. Up to **3.5**× serving throughput vs. TensorRT-LLM.
- Project lead: quantization and sparsity algorithms, GPU kernels, serving runtime, and integration.

mit-han-lab/torchsparse (1.5K Stars)

- Efficient GPU sparse-convolution library for training and inference in 3D deep learning.
- Adopted by Microsoft TRELLIS, Waabi Flux4D, One-2-3-45, Argoverse 2, etc.
- Project lead: algorithm and system architecture, GPU kernels, runtime, and deployment.

mit-han-lab/fastrl

- Efficient RL framework for reasoning LLM post-training.
- Up to **2.1**× end-to-end RL training speedup over verl, with lossless on-policy rollouts.
- Project lead: algorithm design, system architecture, and RL training framework.

Teaching and Service

Co-Instructor & Lecturer, MIT 6.5940: TinyML and Efficient AI Computing (∼400 students) Fall 2026

Teaching Assistant, MIT 6.5940: TinyML and Efficient Deep Learning Computing Fall 2024

Conference Reviewer: MLSys, NeurIPS, ICML, ICLR, CVPR, ICCV, AAAI, etc.

Invited Talks

[12/2025] Physical Intelligence – ForeAct: Steering Your VLA with Efficient Visual Foresight Planning

[06/2025] Meta – LServe: Efficient Long-sequence LLM Serving with Unified Sparse Attention

[05/2025] MLSys – QServe: W4A8KV4 Quantization and System Co-design for Efficient LLM Serving

[05/2025] MLSys – LServe: Efficient Long-sequence LLM Serving with Unified Sparse Attention

[04/2025] Databricks – QServe: W4A8KV4 Quantization and System Co-design for Efficient LLM Serving

[05/2024] NVIDIA – QServe: W4A8KV4 Quantization and System Co-design for Efficient LLM Serving

[10/2023] MICRO – TorchSparse++: Efficient Training and Inference Framework for Sparse Convolution
